Art Unit: 1652

Claims 1, 3, 4, 8-16, and 20 have been canceled. Claims 2, 5-7, 17-19 and 21-41 are still at issue and are present for examination.

Claims 24-41 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse the response filed 10/4/04.

Applicants' arguments filed on 10/23/06, have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1652

Claims 2, 5-7, 17-19, and 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Li et al. or Rothwarf et al. (Reference C27 of Applicant's PTO-1449) in view of Traincard et al. and Epinat et al. The rejection is explained in the previous Office Action.

Applicants argue that the combination of references fails to teach or suggest a method for reconstituting a substantially homogenous IKK protein complex comprising at least the IKK γ subunit. Applicants argue that mammalian systems as taught in the art do not form substantially homogenous complex because the exogenous IKK gene products complex with endogenously produced IKK gene products. However, this is not persuasive as the cited art clearly would have led a skilled artisan to reasonably expect that similar complications would not occur when the IKK complexes are produced in yeast as the art leads a skilled artisan to conclude that yeast do not endogenously produce IKK proteins. As such any IKK complexes formed would necessarily have to comprise only those IKK subunit proteins produced from the heterologously introduced IKK genes and therefore would be homogenous in composition.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
